**Pure-Data-Application**

Sound-application for the background sound.

In addition to that, this app plays sounds (WAV) for the random filmclips by receiving a command from the main iMac-application via ethernet.

**Pure-Data-Application**

Movieplayer for the main background film (QT).

In addition to that, the application plays randomly one of four overlay-films (QT), sending a command to the sound-app on the Mac mini via ethernet, telling which of the four films was chosen.
